Objective

A dedicated Full Stack Web Developer with a strong focus on frontend technologies. Leveraging several years of experience in the field, with a proven ability to develop efficient, scalable, and maintainable web applications. Committed to staying up-to-date with the latest technologies and applying them to solve complex business problems.

Highlights of Qualifications

- ❖ Proficient Full Stack Web Developer with expertise in JavaScript and a focus on frontend technologies.
 - ❖ Certified in Frontend Development and ReactJS, with extensive experience in developing and maintaining complex web applications.
 - ❖ Lifelong learner with a track record of staying updated with the latest industry trends and technologies.
 - ❖ Excellent project management skills, demonstrated in coordinating a web development team and overseeing multiple concurrent projects.
 - ❖ Strong communication skills, adept at liaising between teams and stakeholders.
 - ❖ Detail-oriented and dedicated to ensuring the high quality of code and design in all projects.
-

Technical Skills

- Languages: HTML, CSS, JavaScript, Python (fundamentals)
 - Frameworks/Libraries: ReactJS, NodeJS, ExpressJS, NextJS
 - Firebase (Database, Storage, Authentication, Serverless Cloud Functions)
 - SCSS, TailwindCSS, Styled Components, CSS-in-JS, CSS Modules
 - Bootstrap, Material-UI, Semantic UI
 - Git, Github (including Github Actions for CI/CD), GitLab (with CI/CD)
 - Adobe Photoshop, Figma
-

Professional Experience

Web Developer, Blockstream Inc. (Remote, Canada, Industry: Blockchain), 06/2021 - present

- Lead the development and maintenance of 12 websites and 3 web applications using diverse technologies like Flask, Django, Ghost, Wordpress, Jekyll, ReactJS, and WebAssembly, contributing to a two-fold increase in hardware wallet sales.
- Successfully migrated the main blog from Jekyll to Ghost, enhancing the marketing team's usability and doubling visitor traffic through technical SEO improvements.
- Developed and maintained five internal development tools, including automated testing systems, data synchronizers, and established a Content Delivery Network (CDN) for styling and scripts, streamlining development time, and promoting brand consistency across all websites.
- Implemented task tracking via GitLab Issues, optimizing the web development workflow, ensuring project deadline adherence, and fostering efficient task distribution within the team.

Self-Employed, Dalu Solutions (Calgary, Canada, Industry: Construction), 02/2020 – 05/2021

Marketing manager, DTEK (Ukraine, Industry: Utilities), 05/2018 – 03/2019

Strategy and Business Development Manager, DTEK (Ukraine, Industry: Utilities) 06/2016 – 05/2018

Commercial operations manager, Co-op Union “Gospodar” (Ukraine, Industry: Agriculture), 06/2014- 05/2016

Marketing manager, Agrovod Inc. (Ukraine, Industry: Agriculture), 02/2012 – 06/2014

Freelance Projects / Independent Work / Side Projects

Full Stack Developer at VideoDub (Remote., <https://videodub.io>), 02/2023 – present - Designed and created a full SaaS application that helps users use Artificial Intelligence (AI) models to translate and voice over any video in seconds without manual work. That application was built as two separate applications. The first one is using NextJS, Firebase (including Cloud Functions), and TailwindCSS. The second one is a server API app hosted on a CPU optimized droplet on DigitalOcean and built using NodeJS/ExpressJS. Also, the app uses cloud AI models for speech recognition and voice generation, and the payment processing is built using Stripe.

MeteorJS Internship at Creatella (Remote., <https://createl.la/>), 03/2016 – 06/2016 - Participated in creating a gym app for web and mobile (front page, user authentication, dashboard and calendar), worked in a distributed team with members from different countries.

HTML/CSS Developer, part-time freelancer at Smarthrinolabs (Remote, <http://smarthrinolabs.com/>), 03/2015 – 11/2015 - HTML and CSS code editing for auto-generated web pages.
